Why did I buy it... why

I know it was gonna drive me crazy, and damnt it does !

10/10 would anger bang.. In-depth video review available at: <https://youtu.be/PE3To2oCOEU>

VINDICTA, especially on sale is absolutely a good buy. It's one of the few "proper" FPS style VR games. It has polished visuals, gunplay and sounds. It's not perfect by any means, and it's a bit harder to recommend at full price at the moment but I believe it will be worth the money upon completion (the addition of two more levels at least + tuning it up).

Pros:

Great movement options, classic analogue movement, default movement is an arms swinging one that feels really good.

Majority of the weapons are very nice to use.

Feel of killing things is usually satisfying and responsive, very Arcadey in feel.

Linear "story"-based progression, nice to see an actual world being created.

Decent length for price/quality.

Cons:

A few weapons felt awkward to aim, not sure if that's on me or not.

They mention stealth which is completely misleading, I hope all mention of stealth is removed from the store page! They also suggest hiding behind things which is usually not the most advantageous way to play.

Some kind of silly bugs like the robot-bugs walking through doors.

Level design is functional but makes no sense, which makes the over all feel a bit cheaper.. Nope. Not worth your \$15.00. Its about 130am. I was about to go to sleep and Preta has finally come.

Short Preview!

the video demonstrated for the game is nowhere in visual quality of this early access game. Character, sound, animation, effects are very very good. I used a xbox one controller. I played for the first 30 minutes, it appears this game will have depths as after the tutorial, I was placed in a town where I can enhance various aspects of my character. This is indeed something special.. Plays like a mobile game. Not so much a 'strategy game' as a, 'put time in to get damage multipliers that let you progress'. Forced tutorials that only let you click 1 thing, and dont let you explore make it really bad feeling. A very 'active' experience of needing to move guns to reload, and activate ultimates, means you have to also pay attention. It also only has 1 fast speed, which seems to only be 2x.. i bought it because i still play multiplayer, but it doesn't work.. waste of money.. its high fu cking noon

Its a fun game, if you have time to burn this is a good game for anyone to play with. Its a simple game were you get orders and have to drag that order to the corresponding place. Try to get a perfect score for a high score. Its a simple point click game. The sounds in the game can get repetitive but you get used to it after awhile. This game doesn't take long to beat. It is for anyone that likes a simple game which is alot of fun.. i want my money back worst game ever need to take this off the store . Basically, it is impossible to figure out how to play this game. No explanation of how corporations work or how they relate to the planet \$ values which also aren't explained. No useful tooltips. No in-steam manual and the link to the manual on the company website is dead.

Might be a good game I guess just no way to find out.. Very simple to pick up and control this faced paced twin stick shooter, but it is a very cahllenging game also. Basically fight off 5 waves on enemies then a boss, rince and repeat and it gets harder each time, every 30 levels reach a new zone. 7 Diverse characters to chose from ragning from a flame shooting pyromancer to a molotov concktail throwing chainsaw weidling redneck. Many items to pick up and skill to learn and level and most of all many monsters to kill. What is there not to like. Indie game of the year for me.. I'm guessing because of the motion sickness issue (to which thankfully I'm not prone), there's a shortage of flying games in VR. This one is well done, and well worth the four bucks.
